

Encounter Craft This week – Fun Portraits

There are many fun ways of creating portraits – either self-portraits or pictures of somebody else. Have a look at these examples which might inspire you!

Collage with paper

Mixed collage – these artists have used lace, feathers, paper, buttons, cardboard and pom-poms!

These use natural items like leaves, petals, berries and twigs

These fantastic portraits are all made out of food!
Fruit, vegetables, pasta, seeds... You could even try cereals!

And these are painted in the bottom of egg carton trays... Very effective as they would look different from every angle

And a **top tip**: eyes are almost halfway down the face, not near the top as people often think when they draw a face! Have a look straight in the mirror and see...

HAVE FUN!!
