

## Oasis Craft – 2<sup>nd</sup> July This week – Under the Sea

**There are such amazing shapes, colours and textures  
in the wonderful world of sea creatures!**

### Rainbow Fish

A fabulous way to recreate the colourful scales of a rainbow fish is to cut up celery and use the cut surface as a printing tool to make the scales – it's the perfect shape!  
(There's a fish template with these sheets.)

### Octopuses

Did you know an octopus has blue blood, three hearts and is very intelligent?! These cheery chaps in the picture are made using a well-known breakfast cereal as a great way to represent the suckers on the arms – they're not legs, as I'd always thought! Bubble wrap printing makes a great background.

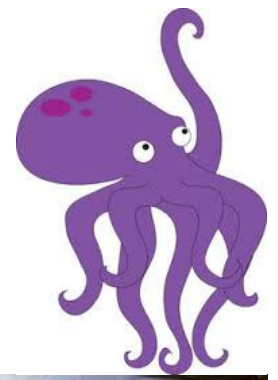

And this cute octopus is simply a painted toilet roll that has had strips cut up from the bottom and then rolled around a pencil to create curly arms. The suckers have been drawn on in pen, but you could combine the two crafts and add on the cereals to make them 3-D.

## Crab

Another great way to get the perfect shape for a creature using handprints! Both hands are printed here, joined at the base. Some little eyes on the end of the thumbs and you have an instant crab!

## Lobster

This combines handprints and a footprint! Then add in the extra details and some funny eyes for a really cheeky lobster!

## Play Dough Sea Scene

There are endless ways of using play dough to make this. You could collect shells and little pebbles to make a shoreline and add model fish if you have some – or make your own! Mix different blues and greens to recreate the many beautiful colours of the sea and add some glitter for glinting, sparkling waves!

**HAVE FUN!!**
